6.1" display 6.6" display 6.8" display

The new Samsung Galaxy S23 series opens up a new era for nighttime photography and mobile gaming. With the 200 MP camera of the Galaxy S23 Ultra, you can now capture the tiniest of details and the brightest of colors in every lighting situation – and take extra-bright nighttime portrait shots with the 12 MP selfie camera with Dual Pixel technology. The new, powerful Snapdragon 8 Gen2 processor and the longer battery life take mobile gaming to a brand new level. Enjoy playing your favorite games in all lighting situations thanks to the brighter and more intelligent display – whether in direct sunlight or in total darkness. The adaptive colors also reduce eye fatigue. And the GorillaGlass Victus 2 is even more resistant, so your Galaxy S23 is protected like never before.

Galaxy S23 Ultra highlights

- 6.8" Edge Dynamic Infinity-O display 19.5:9 (3080×1440 WQHD+), 1-120 Hz
- Quad main camera: 200 MP Wide (f/1.7) + 12 MP UW (f/2.2) + 10 MP 10× optical zoom (f/4.9) + 10 MP 3× optical zoom (f/2.4), laser AF, front camera 12 MP (f/2.2) 2PD
- 8 GB DDR5 RAM / 256 GB, 12 GB DDR5 RAM / 512 GB / 1 TB memory
- 5000 mAh battery with 45 W Fast Charging technology
- On-display ultrasonic fingerprint sensor
- Wireless PowerShare, WiFi 6E, UWB
- IP68, GorillaGlass Victus 2
- Dual SIM + eSIM

Nightography 2.0

Capture extraordinary details in every situation with the new 200 MP camera of the Galaxy S23 Ultra. The larger aperture combined with advanced pixel binning options and improved optical stabilization ensure richer colors in bright and dark areas for breathtaking HDR shots. Portrait photos, selfies and videos are sharper and clearer, even at nighttime, as the slightest movements and vibrations are perfectly corrected. It is now possible to record 4K videos in HDR10+ judder-free at 60fps with an autofocus that is 1.5× faster than the previous model. With the Galaxy S23, you will no longer miss any details and can capture your most precious moments more vividly than ever before.

Ultimate performance

The Samsung Galaxy S23 series is equipped with an exclusively developed Snapdragon processor that delivers outstanding performance. It uses nanotechnology to increase computing power by 33% and graphic processor performance by 44%, and together with its 2.7× larger cooling system it creates a brand new gaming experience. Optimized battery management combined with even larger batteries for the Galaxy S23 and S23+ result in 22% longer operating life. The brighter and more intelligent display is characterized by lower battery consumption, better visibility in sunlight and greater comfort for your eyes. This is thanks to the Adaptive Vision Booster with 1750 nits that creates a better contrast ratio and color management as well as a new Eye Comfort Shield. Everything is protected better than ever before, thanks to the new GorillaGlass Victus 2.

Presented in the best light

The brand new 12 MP selfie camera is perfectly and discretely integrated into the display and can focus 60% faster than the previous model thanks to the Dual Pixel technology. Even in poor lighting conditions, it creates amazing results for high-quality portrait photos and videos. The new AI Object-Aware Engine provides crisp and clear nighttime selfies with authentic colors and textures that are optimized especially for social media apps. The new floating camera design of the Galaxy S23 and its colors inspired by nature make it stand out from all previous Galaxy S series.
